Title which must accommodate for a really long project name

The proposal focuses on the topic of seniors, the number of health supplements they need for life and the shame that often accompanies a mixture of other feelings about their quality of life.

The goal was to design an elegant piece of jewelry that can take advantage of the stuffing of medicines and other necessities that they must always have with them. It is intended primarily for storing drugs, candies for diabetics and patient identification data.

Within the set, it is possible to choose a piece of jewelry with three small and one large capsule, three small capsules and a magnifying glass or a large capsule. It is also possible to choose from chain variants: elegant silver or casual cotton in various colors. A nurse incorporated in the body of a fashion accessory will convince everyone that medical aids and accessories can be worn with joy and elegance.
